

## NEUROLOGICAL SUPPORT

Dated September of 2016

### Background

Some U.S. Veterans has experienced long-term neurological changes due to the physical and emotional traumas of war. Additionally, our Veterans have been exposed to toxins that can manifest into neurological impairment including early childhood vaccines, chemical exposure during war, and oxygen deprivation of wounded soldiers during surgery. Roskamp Institute of Sarasota, FL. (<http://roskamps.com/>) studies the sources of Gulf War Illness and Exhibit 1 contains an abstract of the neurological effects on mice from the same pesticide chemicals that were used to control sand fly infestations biting the troops in both Iraq and Afghanistan.

### Potential Health Benefits of the WIT Technology

WIT Technology in collaboration with RK Water offer complementary, water-only products that likely will ameliorate the side effects of these toxins. We offer two therapeutic products either in a liquid form (Polarized Water) or a gas (dioxytetrahydride). A comparison of the attributes of both products are presented in the table below.

POTENTIAL PRIMARY HEALTH BENEFITS	GAS GENERATED BY WIT MACHINE	POLARIZED WATER
Hydration of Brain	N/A	Yes
Detoxification	N/A	Best
Mental Clarity <sup>1</sup>	Best	Good
Natural Anti-inflammatory	Best	Good
Nutrient Transport to Brain	N/A	Yes
Stabilization of Peroxide Produced by T-Cells at Topical Wound Sites	N/A	Yes
Provides O <sub>2</sub> to Cells to Support Surgery Recovery <sup>2</sup>	Best	Good
Provides Electrons to Support Mitochondrial Functions	Yes	Yes
Peace of Mind <sup>3</sup>	Yes	Yes

All products, written information, testimonials and other statements provided on this report have not been evaluated by the Food and Drug Administration. These products are not intended to diagnose, treat, cure or prevent any disease. For all health concerns, please consult with an appropriate licensed healthcare practitioner.

Notes: <sup>1</sup> Mental Clarity: The potential mechanism when the patient breathes the dioxytetrahydride gas is that there is a delivery of electrons and protons to the Myelin Sheath within neurons which improves the transport of information. A good analogy of the Myelin Sheath is like an accelerator that propels negative and positive charges essential for healthy cognitive functions.

<sup>2</sup> Provides O<sub>2</sub> to Cells to Support Surgery Recovery: Anesthesia, that deprives the brain of oxygen, was likely administered to wounded veterans during surgery. The WIT products may alleviate the resulting adverse health effects by restoring O<sub>2</sub> to the cerebral nervous system during post-surgery recovery.

<sup>3</sup> Peace of Mind: The calmness experienced by the patient may result from the WIT products supporting a better balance of endocrine glands functions such as the production of the hormones epinephrine and norepinephrine by the adrenal glands which is part of the fight-or-flight response. Exhibit 2 contains an email, dated September 22, 2016, from Dr. Deborah Cox Wood, PhD, ND and owner of The Renova Center located in Norfolk, VA. (<http://www.therenovacenter.com/>), that offers therapies for veterans suffering from the effects of Post-Traumatic Stress Disorder.

### More Information

Website Link for RK Water: <http://rkmi.com/water/custom-manufacturing/>

Website Link for WIT International: <http://www.wateriontechnologies.com/>

Website Link for AquaNew (manufacturer of Polarized Water and on the market since 2007 under the U.S. registered trademark names of Watt-Ahh<sup>®</sup> an AquaNew Water<sup>®</sup>): <http://www.aquanew.com/>

This report includes information also provided by Dr. Carol Brown, M.D., who indicated a willingness to discuss these mechanisms with other healthcare practitioners. Dr. Brown stated... "One of the great things about the Polarized Water is that it not only flushes out poisons and toxins, it increases and stabilizes the nervous system so it can function at its maximum potential."
